DOMINATOR[®]

ELECTRONIC DOOR OPENING SYSTEMS

The Dominator roller garage door opener has an ultra compact side profile that allows installation into almost any limited side-room situation. The opener features soft start/soft stop, which ramps up at the start and decelerates at the end of a cycle. This reduces load and wear on the opener and softens the point of contact when the door finishes closing. Included with the opener is a pair of stylish and compact four button key ring transmitters which generate over 4.29 billion random access codes. With a Dominator automatic garage door opener, you can access your garage in comfort and security.

FEATURES

- Requires only 40mm side-room*
- Soft start/soft stop
